BUILD SAWMILL AT DURANGO

Plant Will Have Capacity
of 250,000 Feet Every
24 Hours.

Chihuahua, Mex., March 21.—W. B. Depew, who has just resigned the superintendency of the great lumber enterprise of the Madera company, limited, at Madera, Chih., is going back to the city of Durango, in the state of Durango, to build there a sawmill with a capacity of 250,000 feet every 24 hours; also a planing mill and box factory.

This enterprise is to be established by a Mexican company, headed by Edward Hartman, of Durango. Hiram C. Smith, managing director of the Madera company's enterprise at Madera, is also interested in the Durango enterprise. Mr. Depew states that the Durango sawmill is to be a duplicate of the mills of which the Madera company has two, one of which is in operation and the other being prepared for operation.

The Durango lumber enterprise means the development of an immense timber tract about 100 kilometers west of that city, and to which the National Railways of Mexico is now building a railroad from the city of Durango.

ROBY NOW AFTER TEXAS CENTRAL

Third Lumber Yard to Be Opened There—Big Acreage in Peanuts.

Roby, Texas, March 21.—The railroad committees of Abilene and Roby have taken up the matter of making inducements to the Texas Central railroad to continue the extension of its line from DeLeon to Cross Plains, on through Abilene and Roby. The extension of the Texas Central will be completed into Cross Plains by Sept. 1, it is announced by the road.

Overtures have been made by Haskell to secure the extension of the Estacado & Gulf railroad by way of Plasterco and Hamlin. The \$150,000 plant of the Texas Cement Plaster company is located at Plasterco, which is in Fisher county, about 29 miles distant from Roby, and is located on a branch of the Orient railroad. However, it is believed that it is the intention of the builders of the Estacado & Gulf to go into Fort Worth by way of Albany, Breckenridge and Palo Pinto, traversing a large undeveloped area of coal territory in Palo Pinto county.

The Tom Polk company has sold about \$10,000 worth of its holdings in Roby, principally to local persons and bankers in surrounding towns. The rains of the past few days have given added stimulus to the activity in real estate trading.

Wm. Bradford, of Sweetwater, and a member of the Bradford Lumber company, extensive operators of this section, was in Roby, negotiating with Charles W. Rogers for the purchase of a site for a lumber yard. Mr. Bradford is locating here in order to accommodate his trade in this section, which formerly bought their lumber in Sweetwater. His company will put in a \$50,000 stock here. This will give Roby three lumber yards with the coming of the R. B. Spivey people, who are operating in all the new railroad towns in central west Texas.

The contract has been let for the furnishings and fixtures of the courthouse, now under construction. This contract will run the cost of the courthouse to upwards of \$75,000.

Light rains have been falling for several days over this section. There is a better season in the ground at this time than several years past. Farmers around here almost to a man have learned the lesson of plowing early and deep, and as a result all of the land was turned over through the winter.

Owing to the good crop of cotton made last year, the acreage will not be diminished, counting the new land that will be planted to cotton, but many farmers will plant big acreages of peanuts.

COURTLAND PEOPLE DEFER ON POSTOFFICE

Numerous Location Petitions Are Circulated—Office May Be Made This Year.

Courtland, Ariz., March 21.—Several petitions have been circulated to have the Courtland postoffice moved, the residents of the south side claiming that the office should be moved to the permanent townsite and be nearer the two depots, where a suitable building will be furnished the government free of rent.

The Center Courtland petitioners want it to remain where it is and the people of the McFarlane and Horton townsites desire it moved to the north side, which would be over two miles from the depots. Considerable feeling has developed, but an inspector is expected in a few days when the matter will be adjusted for the best interests of all concerned. The office closes its first year April 6, when it will undoubtedly be made a third class office as the postal receipts have passed the \$2500 mark. A star route is contemplated which will supply Rucker, Light and Wilgus postoffices.

Mr. and Mrs. E. W. Mears, formerly of Clovis, N. M., have leased the Western hotel and taken possession. This hotel is located on Main street, convenient to the depots and it is the largest and best hotel building in central Cochise county.

An all night rain has caused a smile on the faces of the many new settlers in the valley surrounding Courtland.

Mrs. Harry Locke and Mrs. Newton Trenham entertained a large company of friends in honor of Mrs. Gibbons, with six tables of "50's."

Courtland Young, treasurer of the Great Western Copper company and for whom the town was named, is visiting his brother here. His home is at Clinton, Iowa.

Charles A. Dinmore and wife, of El Paso, spent several days in and around Courtland.

SHOWERS AT TORREON.

Torreón, Mex., March 21.—During the past few days light showers have been falling in this district, a very unusual thing for this time of the year. The rains, however, have not been heavy enough to supplant irrigation, but they have laid the dust and cooled the atmosphere to an agreeable extent. At the present time heavy rains would not be appreciated by the cotton growers, who are now busy with their ploughing and planting.

LABORERS COMPLAIN OF HIGH COST OF LIVING.

Construction Work on Railroad from Durango Progresses—Sawmills to Be Operated.

Torreón, Mex., March 21.—It is reported that a number of workmen on the new railroad being built from Durango into the forests have left some of the camps under the pretext that the contractors in charge of the commissaries are charging such an exorbitant price for goods that it takes all of their earnings to buy simple food. This report only comes from a few of the camps along the line. The others are said to be very satisfactory.

General construction work along this line is progressing rapidly and it is said that the road into the great timber tract will be completed within 13 months and several sawmills will be in operation within the next 12 months.

RAIN ASSURES BUMPER CROPS

Presidio County Ranchers and Stockmen Jubilant Over Rainfall.

Marfa, Tex., March 21.—People in this section are jubilant over the heavy downpour of rain. In the immediate vicinity of Marfa the rainfall was light, but on the south, north, east and west as far as Valentine the ground is reported soaked. In the Shafter and Alamito districts south of Marfa the creeks and water holes are full.

It is said to be one of the heaviest rains that ever visited this section. In the farming districts more acreage was put in cultivation this year than ever before and abundant crops are now assured. Stockmen in nearly all parts of Presidio county will have plenty of water and grass, and altogether the precipitation will be worth thousands of dollars to this section.

About 50 land suits filed by the state, through its land agents, against "squatters" mostly Mexicans in Presidio county, will be tried in Austin at an early date. There is much speculation as to how these cases will terminate, and the interest will be intense, as several thousand acres of valuable land are involved.

G. W. Hyman writes from San Antonio that he and his family will soon return to Marfa to reside permanently.

H. D. McCaskey, of the United States geological survey, is here from Washington, D. C., en route to Terlingua, where he will do some government surveying.
